

MULTI-MEDIA SYSTEMS

The Multi-Media systems offer a wide range of capabilities. From cleaning surface grease and oil to stripping rust or paint, the M-Series can achieve any surface profile, while using either hard or soft abrasives. The controls are so precise that it is able to remove paint from a light bulb without damage! The low profile design allows for easy handling and filling of abrasive.

These units can be used with a wide range of media including sodium bicarbonate, aluminum oxide, plastic media, glass beads, crushed glass and even steel grit.

With a range of multiple sizes available and the fact that it features trusted Schmidt valves and controls, the M-Series is a must for any project.
